THE INNOVATIVE SOLUTION  
FOR ALERTING & COMMUNICATION

# ADVANTAGES OF SmartVOX® SYSTEM

## WIRELESS COMMUNICATION BETWEEN PRODUCTS

Reduce wiring cost and gain flexibility for future site upgrades: freely add or move SmartVOX® equipments as needed!

## PRE-RECORDED AND FULLY CUSTOMISABLE VOICE MESSAGES

Deliver clear information and increase efficiency.

## VERY HIGH OUTPUT: UP TO 126 dB (A) AT 1 M

Alert over long distances and in very noisy environments, while reducing the number of sounders.

## ALERT SCENARIOS TAILORED TO EVERY SITUATION

Broadcast the appropriate messages using the wide range of configurable triggering devices.

## BUILT IN BATTERY BACK UP

Stay operational and continue broadcasting even in case of power cuts.

## SELF MONITORING

Continuously supervise the network devices and components (battery, main power supply, radio communication, system...)

INPUT  
OUTPUT

## OUTPUT RELAYS AND TRIGGERING INPUTS

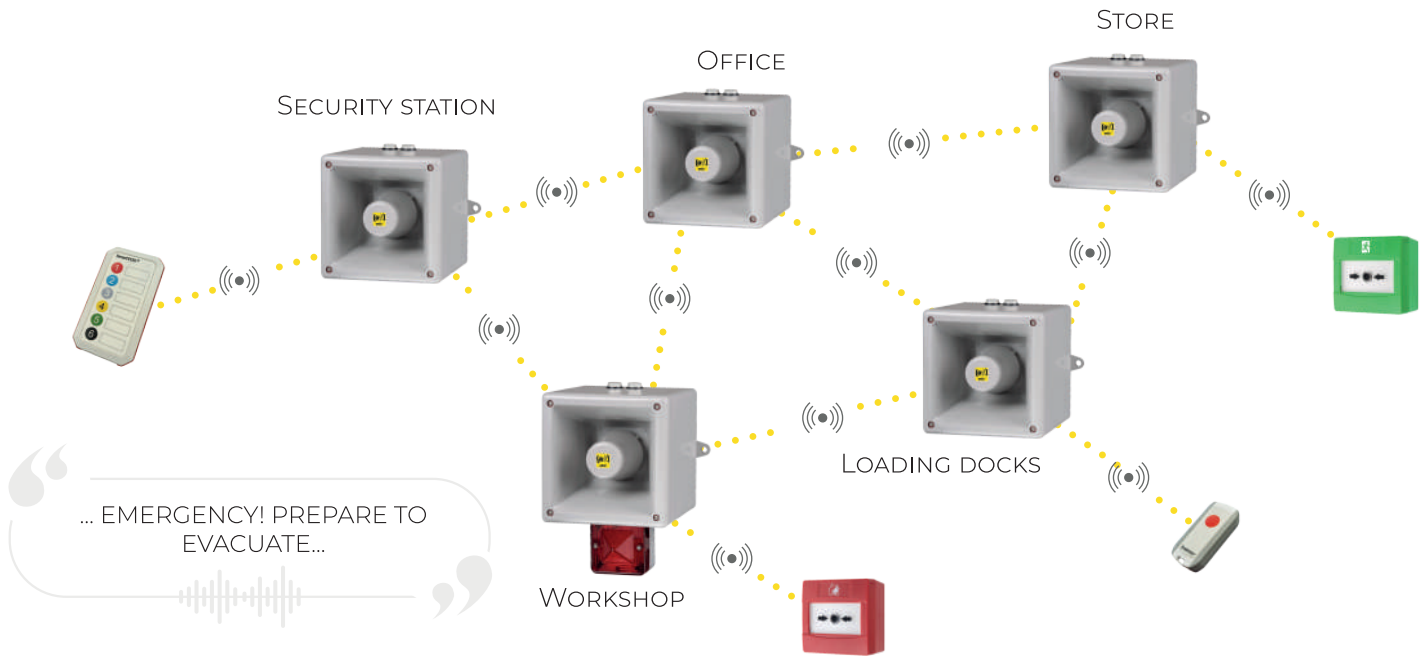

Interface SmartVOX® devices with other equipment (e.g. 5G modem, PLC, gates ...)

## HIGH INGRESS PROTECTION RATING

Install SmartVOX® devices indoors or outdoors (IP66 - IP67)

# REDUCED INSTALLATION COST

## MESH RADIO LINK

SmartVOX® devices communicate via a LoRa radio link and require only a 12 Vcc or 230 Vac power supply. When multiple SmartVOX® sounders are installed, they automatically form a secure mesh network where each unit acts as a repeater. This topology extends both the coverage and reliability of the network.

This innovative wireless technology offers:

- High reliability
- Long-distance communication: up to 1.2 km in open areas between two SmartVOX® units
- Excellent coverage in buildings

# EFFORTLESS CUSTOMISATION

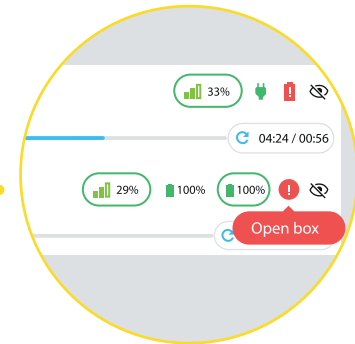

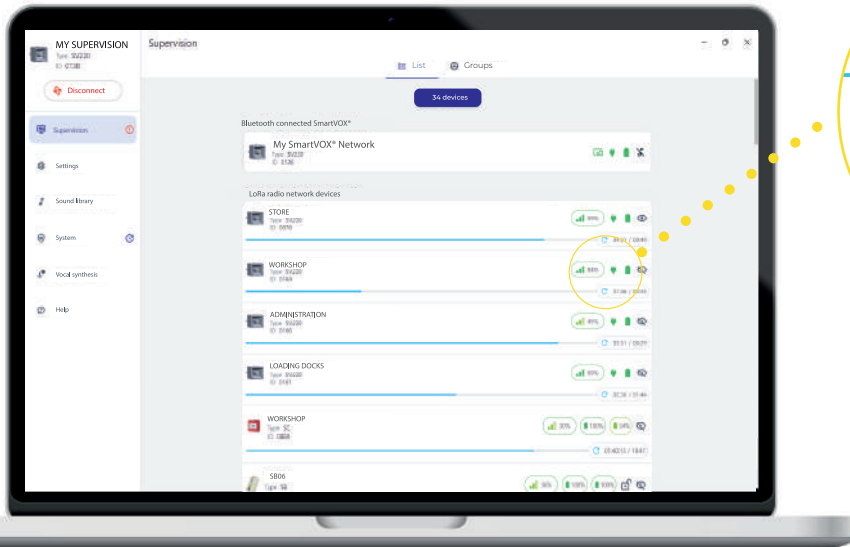

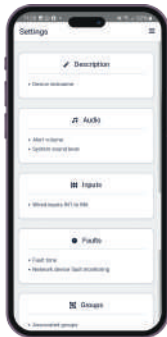

SmartVOX® devices are fully customisable via the application available on PC and Android mobile.

WORKS  
Type SV  
ID 016A

SECURITY  
Type SV230  
ID 029A

Check the status of all SmartVOX® devices of the network

ADMIN  
Type SV  
ID 0166

Connect via Bluetooth and USB:

- Select sounds and messages from the library or create your own using the integrated text-to-speech feature.
- Set conditions and broadcast durations for each scenario.
- Create groups for targeted broadcasts and alerts by zone.
- Adjust the sound level of each SV sounder and scenario.
- Set security parameters (PIN code, radio network identifier...).

# SmartVOX® RANGE

## RADIO VOICE SOUNDERS

	White	Grey	Red
12 Vcc	SV012AW	SV012AG	SV012AR
230 Vac	SV230AW	SV230AG	SV230AR

To add an option, replace the letter **A** with the letter of the corresponding option.

Option **T** | Tropicalised electronics

## RADIO VOICE SOUNDERS WITH BEACONS

	White	Grey	Red
12 Vcc	SVL012AWX	SVL012AGX	SVL012ARX
230 Vac	SVL230AWX	SVL230AGX	SVL230ARX

To add an option, replace the letter **A** with the letter of the corresponding option.

Option **T** | Tropicalised electronics

For the lens color, replace the letter **X** with the corresponding number.

## RADIO REMOTE CONTROLS

1 button	SR1AW
4 buttons	SR4AW

## RADIO REMOTE CONTROL BOXES

White and black enclosure	SB6AB
White and red enclosure	SB6AR

## RADIO MANUAL CALL POINTS

Black	Red	Green	Waterproof
SC1AB	SC1AR	SC1AG	SCW1AR

## ACCESSORIES

Clear protective cover for manual call points	SA003
Wall mounting bracket for remote control box	SA004
Pole mounting kit for voice sounders	SA009

## Warning system manufacturer for 50 years

### SUPPORT FROM START TO FINISH

A team of experts supports you at every stage of your project : technical salespeople, product manager, engineers.

### ABSOLUTE REQUIEREMENT ON PRODUCTS QUALITY

With more than 40 years of experience in industrial environments, our products are designed to withstand rough environments.

### HIGH QUALITY SERVICE AND REACTIVITY

Hotline, preventive maintenance, remote support, personalised advice... aet brings its expertise at each stage of your project.

Looking for **tailored guidance** or interested in **becoming our partner** in your region? get in touch with us today !
